Vanax L. Kampff

kampffv@oregonstate.edu | Corvallis, Oregon
GitHub: https://github.com/vlkampff

Professional Summary

Physics student at Oregon State University with experience in programming, data analysis, and numerical modeling. Interested in applying technical and problem-solving skills to data analysis and related careers.

Education

Oregon State University — Corvallis, Oregon

Honors Bachelor of Science in Physics
Honors Scholar
Expected Graduation: Spring 2027

Relevant Coursework: Statistics, Linear Algebra, Data Science, Computational Physics, Experimental Physics.

Project Experience

Computational Physics Project — Oregon State University
Fall 2026

- Developed a Python program using numerical methods to calculate electric potentials, fields, and charge distributions on a 3D grid.
- Created visualizations of the results, including potential maps and electric field plots.
- Troubleshot code, checked calculations, and collaborated with a teammate to develop and verify the program.

Experimental Physics Laboratory — Oregon State University
2026

- Collected, organized, and analyzed experimental data from physics laboratory experiments.
- Used mathematical fitting and calculations to estimate physical properties, including lens focal lengths.
- Created graphs and interpreted results to evaluate experimental findings.

Styrofoam Shredder Engineering Project — High School

- Worked on the electrical control system for a Styrofoam shredding machine.
- Wired the electrical control box and helped implement motor start/stop controls.
- Tested electrical functions to verify that the motor controls operated correctly.

Skills

Technical: Python, MATLAB, Microsoft Excel, Data Analysis, Data Visualization, Numerical Methods, Mathematical Modeling, Statistics.

Transferable: Problem-Solving, Teamwork, Attention to Detail, Technical Troubleshooting, Communication.
