Professional Summary

Physics student at Oregon State University with experience in programming, data analysis, and numerical modeling. Interested in applying technical and problem-solving skills to data analysis and related careers.

Education

Oregon State University — Corvallis, Oregon

Honors Bachelor of Science in Physics (In Progress)

Honors Scholar

Project Experience

Computational Physics Project — Oregon State University

- Developed Python code to calculate electric potentials, fields, and charge distributions.
- Created graphs and visualizations to analyze computational results.
- Troubleshot code and worked with a teammate to improve the project.

Experimental Physics Laboratory — Oregon State University

- Collected and analyzed experimental data from physics experiments.
- Used mathematical fitting and calculations to determine physical properties.
- Created graphs and interpreted results to evaluate experimental findings.

Styrofoam Shredder Project — High School

- Assisted in constructing an electrical control system for a Styrofoam shredding machine.
- Worked on wiring the electrical box and implementing motor start/stop controls.
- Checked electrical functions to ensure the machine operated correctly.

Skills

Technical: Python, MATLAB, Microsoft Excel, Data Analysis, Data Visualization, Numerical Methods, Mathematical Modeling.

Transferable: Problem-Solving, Teamwork, Attention to Detail, Technical Troubleshooting, Communication.
